INTERNSHIP COMPLETION CERTIFICATE

This is to certify that Mr. **Pathan Tahirkhan Aarifkhan**, a student **BCA , Semester VI at Sardar Patel College of Administration and Management, SPEC Campus, Bakrol** has successfully completed the **Internship Program under the New Education Policy (NEP) 2020** at **Techno Guide Infosoft Pvt. Ltd.** during the period **29/10/2025 to 18/11/2025**.

During the internship, the student has actively participated in various practical activities and gained valuable insights into the functioning of the organisation. The student has prepared an **Internship Report** based on the learning outcomes and experience acquired during the internship period, as a part of the academic requirement for the degree program.

We appreciate the student's sincere efforts and wish him success in all future endeavours.

Sardar Patel College of Administration and Management, Bakrol

PREFACE

Practical knowledge plays a vital role in strengthening theoretical understanding and developing professional skills. As a part of the academic curriculum under the **New Education Policy (NEP) – 2020**, internship training has been introduced to provide students with real-world exposure and practical experience in a professional environment.

I had the opportunity to undergo my internship at **Techno Guide Infosoft Pvt. Ltd.**, where I was able to observe and understand the day-to-day business operations of the organisation. This internship helped me gain practical knowledge related to organisational structure, work processes, and business practices. It also enabled me to understand how theoretical concepts learned during my academic studies are applied in real-life situations.

The preparation of this internship report is based on my observations, learning, and experience gained during the internship period. This report reflects my understanding of the organisation, its functioning, and the knowledge acquired during the training.

I sincerely hope that this report will fulfil the academic requirements and provide meaningful insight into the learning outcomes of my internship experience.

Pathan Tahirkhan Aarifkhan

BCA Semester VI

Sardar Patel College of Administration and Management, SPEC Campus, Bakrol

ACKNOWLEDGEMENT

I express my sincere gratitude to **Sardar Patel College of Administration and Management, Bakrol and Sardar Patel University** for providing me the opportunity to undergo an internship under the New Education Policy (NEP) 2020. This internship has provided me with valuable practical exposure and an opportunity to apply my academic knowledge in a real organizational environment.

I am deeply thankful to my **Principal, Dr. Suyog Upasani Sir**, for his constant encouragement and valuable guidance throughout the internship period. His motivation has been a great source of inspiration in the successful completion of this project.

I would like to express my sincere gratitude to the **IQAC Coordinator, Dr. Kalpesh Gohil Sir** for his continuous support and encouragement, which contributed significantly to the successful completion of this internship.

I would also like to extend my heartfelt thanks to the **HoD of BCA, Dr. Mehul Patel Sir**, for her valuable guidance, encouragement, and support throughout this internship.

I would also like to express my sincere gratitude to my faculty mentor/guide, **Shakshi Bhavsar**, for his continuous guidance, valuable suggestions, and support during the preparation of this project report.

I would also like to convey my sincere gratitude to the management and staff of **Techno Guide Infosoft Pvt. Ltd.**, especially **HR, Kaushal Vaghela** for providing me the opportunity to work as an intern and for their cooperation and assistance throughout my internship period.

I would like to sincerely acknowledge the **Internship Coordinator, Ms. Vibhuti Bhoi**, and **Internship Member Mr. Hiren Darji** for their dedicated coordination, constant support, and valuable guidance, which greatly facilitated the smooth completion of my internship.

My sincere gratitude goes to my parents and family members, for their moral support, patience, and encouragement, which have been my greatest strength throughout this journey.

Lastly, I extend my appreciation to all my friends and well-wishers, especially my father **Pathan Aarifkhan Akbarkhan**, who directly or indirectly helped me in the successful completion of this internship project.

DECLARATION

I, the undersigned, **Pathan Tahirkhan Aarifkhan**, student of BCA ,**Semester VI** at **Sardar Patel College of Administration and Management, SPEC Campus, Bakrol** hereby declare that the internship project carried out at **Techno Guide Infosoft Pvt. Ltd.** is the result of my own work completed during my **Internship under the New Education Policy (NEP) – 2020**.

I further declare that this project is an original work and has not been submitted, in whole or in part, for any other degree, diploma, or certificate at any other institution. All sources of information and references used in this project have been duly acknowledged.

I also affirm that the project work has been completed under the guidance and supervision of **Shakshi Bhavsar** as part of my internship program.

I take full responsibility for the authenticity of the contents and data presented in this report.

Subject - Letter of Intent to be a Skill Knowledge Provider.

Dear Sir

1. **TechnoGuide Infosoft Pvt Ltd** is desirous to become a Skill Knowledge Partner of Sardar Patel University, V V Nagar and providing internship opportunity to students of BCA.
2. We would be providing internship opportunity to **Pathan Tahirkhan Aarifkhan** in the area of Web development.
3. We understand that the course is commencing on **29/10/2025** and will be for the duration of **21 days** in the academic year 2025-26 divided into VI semesters,
4. As an organization, we shall provide opportunity to the students towards achieving the desirous learning outcomes. We understand that the minimum number of Days the student needs to spend on the learning outcome would be 21 Days per semester.
5. We shall share the Completion letter with the names of the student and course, once the batch is finalized

Your Sincerely,

TechnoGuide Infosoft Pvt. Ltd.,

INTRODUCTION

This internship report presents a detailed overview of the practical training and professional exposure gained at Technoguide Infosoft Pvt. Ltd. from 29th October 2025 to 18th November 2025. The internship was designed to provide hands-on experience in web development, covering both frontend and backend technologies, along with creative design and deployment practices. It aimed to bridge the gap between academic knowledge and real-world industry implementation.

Under the leadership of CEO Moulik Shah, the organization maintains a structured, disciplined, and supportive learning environment. Throughout the internship period, dedicated coordinators actively supervised daily tasks, conducted review meetings, and provided individual guidance to ensure continuous improvement and professional growth. This well-organized approach helped in building technical confidence and understanding industry-level development standards.

During the internship, I worked on multiple practical assignments including Bootstrap-based website development, multi-page frontend design, backend database connectivity, CRUD operations using Python, user authentication systems (Signup, sign in, Admin Panel), API integration for a Weather Application, GitHub version control and website deployment, and creative poster designing using Canva. These tasks provided comprehensive exposure to UI/UX design principles, backend logic implementation, real-time data handling, and live project hosting.

The internship not only enhanced my technical skills but also improved my problem-solving ability, code structuring practices, documentation skills, and understanding of professional workflow. Overall, this training program served as a strong foundation for my career in web development and helped me gain valuable industry experience.

OBJECTIVES OF INTERNSHIP

The primary objectives of the internship at Technoguide Infosoft Pvt. Ltd. were designed to provide practical industry exposure and strengthen both technical and professional skills. The key objectives are as follows:

1. To Gain Practical Knowledge of Web Development
2. To Develop Frontend Development Skills
3. To Understand Backend Functionality
4. To Learn API Integration
5. To Practice Version Control and Deployment
6. To Enhance Creative and Design Skills
7. To Improve Professional and Communication Skills
8. To Understand Industry Workflow.

Overall, the internship aimed to bridge the gap between academic learning and industry requirements while building a strong technical and professional foundation.

DAY-WISE LEARNING OUTCOMES

29 October 2025

Task: Learning Bootstrap | Time: 9:30 AM to 1:50 PM | Duration: 4 Hour 20 Minutes | Status: Completed

My internship at Technoguide Infosoft Pvt. Ltd. began on 29th October 2025, and the first day provided a clear introduction to the company's work culture and expectations. Under the leadership of CEO Mr. Moulik Shah, the company maintains a disciplined yet friendly learning environment. A dedicated team of four female coordinators was assigned to manage and guide us interns throughout the day. Their supportive behaviour, clear communication, and constant availability for doubts made the beginning of the internship smooth and comfortable.

On this day, I started learning Bootstrap, an essential frontend framework widely used in modern web development. I was introduced to the grid system, breakpoints, responsive layout structures, utility classes, and pre-designed components such as buttons, cards, and navigation bars. Through practical implementation, I understood how Bootstrap helps in building responsive and visually structured web pages efficiently. I practiced by creating small layouts and experimenting with various components, which improved my confidence in UI development.

The first day helped me adapt quickly to the company's workflow. It also gave me clarity about how frontend technologies are implemented in professional environments. Learning Bootstrap formed a strong foundation for the upcoming tasks and projects that I later completed during the internship.

Task: Home Page Creation Using Bootstrap 5 | Time: 9:30 AM to 1:50 PM | Duration: 4 Hour 20 Minutes |
Status: Completed

The second day of my internship at Technoguide Infosoft Pvt. Ltd. was more engaging and practical as I began applying the Bootstrap concepts learned on the previous day. The work environment continued to be encouraging and well-organized. The special team of four female coordinators assigned to guide and manage us interns played a very important role throughout the day. They constantly monitored our progress, provided instructions, cleared doubts, and ensured that each one of us stayed on the right track. Their friendly yet disciplined behaviour helped create a learning atmosphere where I felt comfortable and focused.

My main task for the day was to design and build a complete homepage using Bootstrap 5. This required me to understand not only the technical aspects but also how a professional webpage should look in terms of layout, structure, and user experience. I started by planning the homepage sections and then implemented them one by one. Using Bootstrap's grid system, I designed a responsive navigation bar, hero banner, content cards, and featured sections. I also experimented with Bootstrap utility classes to control spacing, alignment, typography, and color combinations.

During the process, I explored advanced components such as carousels, responsive images, and interactive elements that enhance the visual appeal of the page. This helped me understand how frontend developers create modern and appealing interfaces in today's industry. As I progressed, the coordinators occasionally reviewed my work, provided helpful suggestions, and guided me whenever I faced difficulty in layout

alignment or responsiveness. Their guidance improved the quality of my work and helped me understand the importance of clean and structured code.

By the end of the day, I had successfully created a fully responsive and professionally structured homepage. This task boosted my confidence in frontend development and gave me clarity about real-world UI design practices. It also strengthened my ability to translate design concepts into practical webpage layouts. Completing this assignment became a solid foundation for the more complex website components and pages I later built during the internship.

31 October 2025

Task: About & Contact Page Frontend | Time: 9:30 AM to 1:50 PM | Duration: 4 Hour 20 Minutes | Status: Completed

On 31st October 2025, the third day of my internship at Technoguide Infosoft Pvt. Ltd., I continued building the structure of the website by working on two important sections: the About Page and the Contact Page. The company environment remained highly supportive, and the four female coordinators assigned to manage us interns ensured that we followed the workflow properly. They regularly checked on our progress, guided us through the challenges, and helped us understand how professional websites maintain consistency across multiple pages.

The day began with planning the layout of the About Page, which needed to present company information in a clean and visually appealing format. Using Bootstrap 5, I created a responsive section that included headings, text descriptions, team highlights, and structured content blocks. I used Bootstrap’s grid system to maintain balance between text and visuals, ensuring that the page looked professional on both large screens and mobile devices. While building this page, I learned how companies maintain branding, color consistency, and proper typography across different sections of their websites.

After completing most of the About Page, I shifted my focus to the Contact Page. This task required a combination of frontend structure and user-friendly form design. I created a responsive form using Bootstrap forms, adding fields such as name, email, message, and other essentials. I also used spacing utilities and

container structures to improve readability and alignment. The coordinators reviewed the form and guided me on improving spacing, responsiveness, and form usability, which helped me understand how user input forms are designed professionally.

Throughout the day, the coordinators were approachable and ensured that all interns were on track. Their feedback during this task helped me refine my work and develop a better understanding of how every page of a website plays a specific role in user interaction. Working under the structured guidance of the team and the leadership of CEO Mr. Moulik Shah allowed me to steadily progress in my frontend development skills.

By the end of the session, both the About and Contact Page frontends were completed successfully. This day helped strengthen my understanding of multi-page website development, UI consistency, and the importance of clean page structure. It also prepared me for the backend integration tasks that I would handle later in the internship.

01 November 2025

Task: Holiday | Time: — | Duration: — | Status: —

1st November 2025 was officially marked as a holiday at Technoguide Infosoft Pvt. Ltd. Even though it was a non-working day, it still contributed positively to my internship journey. After continuously learning and working on frontend tasks during the first three days, this break gave me time to revise the concepts I had learned and reflect on the workflow of the company.

Even though the office was closed, the supportive environment created by the company and the coordinators continued to motivate me. The four female coordinators assigned to manage us interns had already helped us build a strong learning pace, and the guidance provided during the first three days encouraged me to stay consistent even during the break. The professional attitude of CEO Mr. Moulik Shah and the structured internship approach made me realize the importance of balancing learning, practice, and rest in a real work environment.

Overall, although 1st November was a holiday, it still served as a useful day for revision and planning, helping me stay prepared for the technical tasks scheduled in the upcoming week.

02 November 2025

Task: Holiday | Time: — | Duration: — | Status: —

2nd November 2025 was a holiday at Technoguide Infosoft Pvt. Ltd., marking the second consecutive non-working day of the month. Although no official tasks were scheduled for interns on this day, it still played a meaningful role in my overall internship progress. Having completed several foundational frontend tasks in the previous days, this break provided an opportunity to mentally refresh and prepare for the technical challenges that awaited in the upcoming week.

During this day off, I took time to revisit the concepts of Bootstrap that I had learned so far and reviewed the layouts of the Home, About, and Contact pages I had created. Going through the code again helped me understand how professional developers maintain cleanliness, structure, and reusability in their work. This break also allowed me to reflect on the feedback and guidance given by the four female coordinators who were responsible for managing and supporting all the interns. Their instructions during the working days helped me build the confidence and clarity needed to continue progressing, even during holidays.

Overall, 2nd November served as a quiet but productive day of reflection, revision, and preparation for the upcoming hands-on tasks that would involve backend integration and more complex project development.

03 November 2025

Task: Database Connectivity Check | Time: 9:30 AM to 1:50 PM | Duration: 4 Hour 20 Minutes | Status: Completed

On 3rd November 2025, I continued my internship at Technoguide Infosoft Pvt. Ltd. with a shift from frontend development to understanding backend concepts. After the weekend break and holidays, the working environment felt refreshed, and all interns resumed their tasks with renewed focus. As usual, the four female coordinators assigned to guide us were actively present and supportive, ensuring that we transitioned smoothly into backend-related work.

The primary task for the day was to understand and test database connectivity. This was an important step as it introduced me to how data is stored, retrieved, and managed in real-world applications. Under the structured learning environment of the company, I began exploring how Python interacts with databases and how connections are established using proper configurations. The coordinators explained the importance of secure and efficient connection handling, which helped me realize how crucial backend reliability is for modern web applications.

I practiced establishing a connection with the database, checking whether the server responded correctly, and performing basic operations to ensure that the link between Python and the database was stable. This practical session helped me understand concepts such as drivers, connection parameters, and error handling during connectivity failures. The coordinators monitored our progress, clarified our doubts, and guided us on maintaining clean and readable backend code.

Working under the leadership of CEO Mr. Moulik Shah and the well-organized internship structure made the task easier to grasp. The company maintained a calm, learning-focused environment, allowing interns to experiment without pressure. By the end of the day, I successfully completed the database connectivity test, which gave me confidence to move forward into deeper backend development tasks.

This day marked the beginning of my transition from designing web pages to understanding how real data flows behind the scenes. It provided a strong foundation for the CRUD operations and user-related backend features that I would work on in the upcoming days of my internship.

Task: CRUD Operations with Core Python | Time: 9:30 AM to 1:50 PM | Duration: 4 Hour 20 Minutes | Status: Completed

On 4th November 2025, my internship at Technoguide Infosoft Pvt. Ltd. progressed further into backend programming as I began working on CRUD operations using core Python. Although the task duration was short, it was an important learning milestone because CRUD—Create, Read, Update, Delete—is the foundation of almost every application that handles data. The environment at the company remained structured and supportive, with the four female coordinators continuing to guide us patiently through each step of our technical journey.

The coordinators started the session by explaining how CRUD functionalities work at the backend level and why they are essential for managing user data, product records, and various interactive features in web applications. With their guidance, I practiced creating small Python modules that performed operations such as inserting new data, retrieving stored records, updating existing entries, and deleting items. These exercises helped me understand how logical operations interact with the database layer and how Python communicates with data stored on the server side.

This task also introduced me to the discipline of writing clean, simple, and maintainable code. Even though it was a short session, it made me realize how backend logic forms the core of any functional website or application. The coordinators reviewed my output, offered feedback, and encouraged me to focus on accuracy, syntax clarity, and error-free execution. Their consistent support made this task smooth and insightful.

Although the duration of the task was brief, the learning was meaningful and helped establish a solid foundation for the upcoming backend functionalities that rely heavily on CRUD operations.

05 November 2025

Task: Admin Panel, Signup, Signin, Forget Password | Time: 9:30 AM to 1:50 PM | Duration: 4 Hour 20 Minutes | Status: Completed

On 5th November 2025, the internship at Technoguide Infosoft Pvt. Ltd. moved into a more advanced and practical stage as I began working on essential backend features such as the admin panel, user signup, signin, and the forget password system. This was one of the most insightful days because it exposed me to how user authentication works in real applications. The work environment continued to be disciplined, motivating, and extremely supportive under the leadership of CEO Mr. Moulik Shah.

Throughout the day, the four female coordinators who were responsible for managing the interns provided continuous guidance. They explained the concept of authentication flows, the structure of admin panels, and how user credentials are stored securely in the database. With their help, I implemented the signup and signin systems using Python and database integration. I also learned how forget-password mechanisms work, including validation, user data checking, and secure reset processes.

One notable aspect of this internship is that the team regularly conducts short review meetings during working hours. These meetings are designed to check our ongoing progress, understand our challenges, and ensure that every intern is moving in the right direction. Along with group meetings, the coordinators also personally reviewed my work, pointed out areas for improvement, and guided me with professional-level suggestions. This personalized interaction helped me understand my strengths and weaknesses and allowed me to correct mistakes immediately.

As I continued working, I realized how important it is to maintain clean coding practices, handle errors properly, and ensure that every feature works flawlessly from both the user and admin perspectives. The coordinators encouraged me to focus on accuracy and logic flow, and their feedback improved the overall quality of my code. Their supportive behavior and consistent monitoring made the task much easier to understand and complete.

By the end of the day, I successfully implemented the admin panel and user authentication features. This task significantly improved my backend development skills and gave me a clear understanding of how professional web applications manage users and control access.

06 November 2025

Task: User Update (Database Also) | Time: 9:30 AM to 1:50 PM | Duration: 4 Hour 20 Minutes | Status: Completed

All Users				
ID	Username	Email	Date Joined	Actions

On 6th November 2025, my internship work at Technoguide Infosoft Pvt. Ltd. continued with a focus on backend functionality, specifically the task of updating user information and ensuring that all changes were correctly reflected in the database. This was an important step because it taught me how dynamic user data is managed in real web applications. As always, the work environment remained professional, well-organized, and supportive under the overall leadership of CEO Mr. Moulik Shah.

I worked on creating a feature that allowed user details to be updated through a form and stored securely in the database. This included retrieving existing user information, displaying it in editable fields, validating the updated data, and finally submitting the changes so they could be saved. Through this task, I learned how update queries work, how to maintain database integrity, and how to ensure error-free execution of backend logic. The process improved my understanding of CRUD operations, especially the “Update” part, which plays a major role in user profile management systems.

The four female coordinators assigned to guide and manage us interns continued their supportive role throughout the day. They regularly checked on our progress, solved our doubts, and made sure we were implementing the logic correctly. One of the strengths of this internship program is that the coordinators frequently arrange short review meetings during working hours. These internal meetings help all interns stay aligned with the day’s goals and allow us to clarify any confusions at the right time.

Apart from group meetings, the coordinators also gave personal attention to our work. They reviewed my code individually, suggested improvements, corrected logical errors, and guided me on writing cleaner backend functions. Their consistent involvement made the learning process smooth and ensured that every intern maintained a professional pace. These personal progress reviews motivated me to refine my work and achieve better accuracy.

By the end of the session, I successfully completed the user update functionality, and the changes were reflected accurately in the database. This task strengthened my backend development foundation and taught

me the importance of reliable data handling in professional applications. It also prepared me for the upcoming work on e-commerce interfaces and more complex modules in the following days.

07 November 2025

Task: E-com Home Page Creation Using Bootstrap 5 | Time: 9:30 AM to 1:50 PM | Duration: 4 Hour 20 Minutes | Status: Completed

On 7th November 2025, my internship training at Technoguide Infosoft Pvt. Ltd. progressed into a deeper exploration of front-end development. The focus of the day was on creating the main homepage layout for an e-commerce platform using Bootstrap 5, which allowed me to understand how modern online shopping interfaces are structured in a professional environment. This task required both creativity and technical accuracy, as the homepage serves as the first impression for any user visiting an e-commerce site.

I worked on building a polished layout that included key user-focused sections such as a hero banner for promotions, a clean navigation menu, featured product sections, category cards, and responsive grid structures. Throughout the process, I learned how Bootstrap's utility classes, grid system, and responsive breakpoints are

applied to maintain consistent design across all device sizes. This helped me understand how companies ensure their websites remain visually appealing on desktops, tablets, and mobile devices.

The work environment continued to be positive, organized, and efficient under the leadership of CEO Mr. Moulik Shah. The coordinators ensured that we were following industry-level coding practices, especially regarding layout structure, spacing, typography balance, and component alignment. Their focus on detail helped me understand the importance of UI/UX consistency in real-world projects.

Apart from group interactions, I also received personalized reviews of my layout. The coordinators pointed out areas where spacing could be improved, suggested cleaner card structures, and guided me to refine responsive behavior for smaller screens. Their consistent involvement and encouragement made the learning environment comfortable and highly productive.

TECH TERMINOLOGIES

By the end of the day, I completed a professional, structured, and responsive homepage design. This task significantly strengthened my front-end development skills, improved my understanding of Bootstrap components, and gave me a closer look at how commercial e-commerce interfaces are prepared in the industry.

08 November 2025

Task: Holiday | Time: — | Duration: — | Status: —

On 8th November 2025, the internship day at Technoguide Infosoft Pvt. Ltd. was officially marked as a holiday. Even though it was a non-working day, the previous sessions had already given me enough momentum to reflect on the progress I had made so far. The work environment throughout the internship had been extremely structured, disciplined, and motivating, and even on an off day, the learning mindset stayed active because of the guidance provided during the working days.

The consistent involvement of the four female coordinators in reviewing our code, clearing doubts, and monitoring our tasks had helped me build a strong understanding of the development process. Their regular meetings and progress discussions played an important role in helping interns stay aligned with the company's goals. This level of continuous support made it easy to remain focused even during holidays, as the workflow structure was always clear and well-planned.

Overall, the holiday offered a good balance between rest and reflection, allowing me to return to the next working day with renewed focus and better clarity for the tasks ahead.

09 November 2025

Task: Holiday | Time: — | Duration: — | Status: —

On 9th November 2025, the internship day at Technoguide Infosoft Pvt. Ltd. was observed as a holiday. Even though no official work or tasks were scheduled, the break served as an opportunity to mentally revise and reflect on the progress made during the earlier sessions. The internship had been structured in a way that allowed learning to continue naturally, even outside the working hours, thanks to the clarity and discipline maintained during the active days.

The supportive environment created by the four female coordinators played a major role in this. Their continuous guidance, step-by-step supervision, and personalized feedback throughout the internship helped shape a strong technical foundation. Because of their regular review meetings and one-on-one progress checks, I always had a clear understanding of what I had completed and what I needed to improve. This structure made the learning flow smooth, even on holidays.

Although no active coding took place on this day, the holiday acted as a valuable pause, allowing me to return refreshed and ready for the next phase of development work.

10 November 2025

Task: Weather App Interface | Time: 9:30 AM to 1:50 PM | Duration: 4 Hour 20 Minutes | Status: Completed

On 10th November 2025, my internship work at Technoguide Infosoft Pvt. Ltd. focused on designing the user interface for the Weather Application. This task allowed me to apply my front-end development skills and understand how functional applications must combine clear design with user-friendly interaction. I worked on creating a clean layout that included a search bar, temperature display section, weather icons, and details like humidity and pressure, ensuring the interface remained visually appealing and easy to navigate.

The professional environment under the leadership of CEO Mr. Moulik Shah continued to motivate all interns. The task gave me hands-on exposure to UI/UX principles such as spacing, alignment, readability, and responsive behaviour. I learned how to structure components in a way that provides a smooth user experience, especially for real-time applications like weather apps where clarity is essential.

Throughout the session, the four female coordinators supervised the progress of every intern with the same dedication as previous days. They checked our layouts, corrected design mistakes, and guided us on improving the placement of elements for better usability. As part of the company's structured training approach, small review meetings were arranged during the session. These meetings helped us understand how weather apps are expected to look in professional environments.

Along with group guidance, the coordinators also reviewed my work individually. They pointed out improvements related to typography balance, icon placement, and container spacing. Their personalized feedback helped me refine the interface and made my design more polished and industry-ready. Their constant support ensured that I understood not just what to design but why each design choice matters.

By the end of the session, I successfully completed the weather app interface with a clean, responsive structure that was ready for API integration. This task enhanced my front-end development skills and gave me practical experience in creating real-world application interfaces.

11 November 2025

Task: Weather App API Connectivity | Time: 9:30 AM to 1:50 PM | Duration: 4 Hour 20 Minutes | Status: Completed

On 11th November 2025, my internship work at Technoguide Infosoft Pvt. Ltd. focused on implementing full API connectivity for the Weather Application. This session was one of the most insightful parts of the internship because it introduced me to real-time data handling and advanced API features used in professional applications. I worked on connecting the interface with a live weather API and expanding the application's functionality beyond basic temperature readings.

I successfully implemented multiple advanced features using the API. These included switching between Fahrenheit and Celsius temperature units, displaying humidity, pressure, feels-like temperature, and providing detailed weather descriptions. I also integrated daily weather updates and a complete **7-day forecast**, which showed how the selected location's weather would change over the coming week. In addition, I added average day and night temperatures, sunrise and sunset times, and overall climate conditions—making the app far more detailed and user-friendly than a basic weather interface. This helped me understand how complex weather applications gather, process, and present live environmental data.

The professional and well-organized environment under the leadership of CEO Mr. Moulik Shah continued to support effective learning. Working with real-time data improved my understanding of asynchronous JavaScript, JSON parsing, and UI updates based on dynamic data. This task also taught me the importance of clean code structure when handling multiple API endpoints and complex datasets.

Throughout the session, the four female coordinators provided continuous guidance. They checked my progress, helped me identify errors in API handling, and explained how to optimize the response structure for better performance. As part of the internship routine, short review meetings were arranged during the day. These meetings helped us understand best practices for working with APIs, error handling methods, and efficient UI rendering techniques.

In addition to group sessions, I received personal review from the coordinators. They examined my code functions, suggested ways to simplify data mapping for the weekly forecast, and guided me in presenting the information in a clean and readable format. Their feedback helped refine the final output, ensuring the weather app looked professional and functioned smoothly.

By the end of the day, I completed full API integration with advanced features, transforming the weather app into a complete forecasting tool. This task significantly improved my understanding of real-time data applications, API structures, and dynamic UI development—skills essential in building practical, modern web applications.

12 November 2025

Task: GitHub & Website Deployment | Time: 9:30 AM to 1:50 PM | Duration: 4 Hour 20 Minutes | Status: Completed

On 12th November 2025, my internship at Technoguide Infosoft Pvt. Ltd. focused on learning and implementing website deployment using GitHub. This session was one of the most essential parts of the training because it taught me how a locally developed project is taken to a live production environment. Deployment is a key step in the software development cycle, and gaining practical experience with it significantly strengthened my understanding of real-world development workflows.

During this session, I deployed two complete projects:

1. Restaurant Website
2. Weather Application

First, I uploaded both projects to separate GitHub repositories with a clean and organized structure. I practiced important Git operations including initialization, committing, pushing, resolving authentication issues, and maintaining version history. This helped me understand how developers collaborate and manage multiple projects through version control systems.

Next, I moved to the deployment phase using GitHub Pages. I learned how GitHub hosts static websites, how the project hierarchy affects deployment, and how to troubleshoot common issues such as missing files, incorrect folder paths, script loading failures, and branch configuration problems. Deploying **two different websites in a single session** gave me hands-on experience in handling multiple live projects simultaneously, similar to an industry work environment.

The work environment continued to remain structured and motivating under the leadership of CEO Mr. Moulik Shah. The four female coordinators guided us actively throughout the session. They monitored each step of the deployment process, helped resolve Git-related errors, and ensured that we understood best practices for repository management. As part of their routine training approach, short progress review meetings were conducted during the working hours. These meetings clarified the deployment workflow, branch requirements, and methods to maintain a clean and professional project structure.

In addition to group guidance, I received individual support as well. The coordinators reviewed both of my project repositories, suggested improvements in file placement, corrected index linking issues, and guided me in ensuring that all live-site components worked smoothly. Their continuous supervision made the process easier and enhanced my deployment confidence.

By the end of the session, both the Restaurant Website and Weather Application were successfully hosted online. This task gave me strong practical experience in version control, multi-project deployment, and live hosting—skills that are crucial for any aspiring web developer.

13 November 2025

Task: Poster Designing on Canva | Time: 9:30 AM to 1:50 PM | Duration: 4 Hour 20 Minutes | Status: Completed

On 13th November 2025, my internship training at Technoguide Infosoft Pvt. Ltd. focused on learning poster designing using Canva. This session introduced the fundamentals of digital design, including layout structure, color combinations, typography, spacing, and alignment. Understanding these concepts helped me see how design contributes to branding and user engagement in a real corporate environment.

Under the guidance of CEO Mr. Moulik Shah, the training atmosphere remained supportive. The four female coordinators supervised our work, reviewed our poster layouts, and guided us with professional design standards. They also conducted short review meetings to check progress and correct common mistakes.

I received personal feedback during the session where coordinators suggested improvements in font pairing, spacing, and overall visual balance. These inputs helped refine my designs and improved my confidence in creative tasks.

By the end of the session, I completed multiple posters and gained practical experience with Canva's design tools. This session added an important creative skill to my technical learning during the internship.

14 November 2025

Task: Poster Designing (Pizza, Coffee & Gujarati Thali) | Time: 9:30 AM to 1:50 PM | Duration: 4 Hour 20 Minutes | Status: Completed

On 14th November 2025, my internship work continued with another creative session focused on poster designing using Canva. On this day, I created three themed posters: Pizza, Coffee, and Gujarati Thali. The objective was to practice professional layout structuring, improve visual balance, and understand how to use design elements effectively for promotional material.

Throughout the session, the coordinators guided us closely. They conducted short review meetings to check our progress, corrected alignment issues, suggested better font combinations, and explained how color psychology should be applied in food-related designs. Their continuous feedback helped me refine each poster and maintain a clean, appealing presentation.

By the end of the session, I completed all three posters with improved precision and a better understanding of design principles. This day strengthened my creative skills and added valuable design experience to my internship learning.

15 November 2025

Task: Holiday | Time: — | Duration: — | Status: —

On 15th November 2025, the company had a scheduled holiday. Although no official internship activities were conducted on this day, the break provided time for rest and personal learning review. I used this opportunity to revise the concepts covered during the previous sessions, including poster designing, API connectivity, and frontend development practices. The holiday allowed me to prepare myself better for the upcoming tasks and maintain a steady learning pace during the internship.

16 November 2025

Task: Holiday | Time: — | Duration: — | Status: —

On 16th November 2025, another scheduled holiday was observed at Technoguide Infosoft Pvt. Ltd. Although there were no official internship activities, the day allowed me to refresh and reflect on the progress made so far. I took the opportunity to revisit key topics such as Bootstrap components, CRUD operations, and API handling. This self-revision helped strengthen my understanding and ensured that I remained prepared for the upcoming tasks in the internship.

17 November 2025

Task: Leave | Time: — | Duration: — | Status: —

On 17th November 2025, I was on leave due to personal reasons. Although I could not attend the office, I ensured that all my previous tasks were fully completed and up to date. The supportive environment at Technoguide Infosoft Pvt. Ltd., along with the coordinators' understanding approach, made it easy to manage the leave without affecting my overall internship progress. This day also allowed me to mentally reset and prepare for the final stages of the internship.

18 November 2025

Task: Report | Time: 9:30 AM to 1:50 PM | Duration: 4 Hour 20 Minutes | Status: Completed

On 18th November 2025, the focus of my internship work at Technoguide Infosoft Pvt. Ltd. was on preparing a complete and well-structured report that covered all the tasks, learnings, and progress made during the internship period. This reporting activity was essential because it helped me review everything I had worked on so far—from frontend development and backend implementation to creative designing and deployment activities. Preparing this report gave me a clear picture of how much I had grown technically and professionally throughout the internship.

The work environment remained highly organized and supportive, guided by the leadership of CEO Mr. Moulik Shah. The company ensures that interns don't just complete tasks mechanically but also understand the importance of documenting their progress in a professional format. This approach helped me enhance my communication skills, particularly in writing technical content clearly and systematically.

Throughout the session, the four coordinators continued their consistent support. They guided us on how to structure the internship report properly, what information to highlight, and how to maintain clarity and accuracy. They conducted short review meetings during the session to check whether we were documenting our work correctly and maintaining a professional reporting style. These meetings helped in correcting mistakes instantly and maintaining uniformity across all interns' reports.

Along with group guidance, personal feedback was also provided. The coordinators reviewed my report individually, suggested formatting improvements, corrected technical descriptions where needed, and ensured that the document aligned with industry standards. Their review sessions helped me produce a refined and professional final report.

By the end of the session, I successfully completed the detailed internship report. This activity strengthened my ability to document technical tasks professionally—an important skill for real-world IT environments. It was a productive conclusion to the sequence of tasks completed during the internship.

CONCLUSION

The internship at Technoguide Infosoft Pvt. Ltd. was a highly enriching and practical learning experience that significantly enhanced my technical knowledge and professional skills. Throughout the internship period, I was exposed to real-world development practices that helped bridge the gap between academic concepts and industry implementation.

Under the guidance of CEO Moulik Shah and the continuous support of the coordinators, I gained hands-on experience in frontend development using Bootstrap, backend programming with Python, database connectivity, CRUD operations, user authentication systems, API integration, version control with GitHub, website deployment, and creative poster designing. Each task contributed to building a strong foundation in both technical and problem-solving abilities.

The structured workflow, regular review meetings, and personalized feedback sessions played a crucial role in improving my coding standards, design clarity, documentation skills, and overall confidence. I learned the importance of writing clean code, maintaining consistency across projects, handling real-time data efficiently, and delivering work within a professional environment.

Overall, this internship not only strengthened my web development skills but also improved my discipline, adaptability, and understanding of corporate work culture. It has prepared me to take on more advanced technical challenges in the future and has become a significant milestone in my professional growth journey.
